

Jordan Bortolotti

EXPERIENCE

IBM | FULL-STACK DEVELOPER

Oct 2016 – Present | Toronto, ON, CA

- Extended, maintained, and refactored the UI framework, modernizing a 7 year old project that serves as a linchpin for the product.
- Implemented a cloud login to migrate the on-prem product to the IBM Cloud, as a saas multi-tenant offering.
- Shipped a react component library to hundreds of developers working on a multi-million dollar data analytics project.
- Delivered and maintained node.js microservices for user data upload and onboarding.
- Highly involved with hiring, interviewing, and recruiting team of 20+ developers and mentoring junior developers.

NOKIA | FULL-STACK DEVELOPER

May 2015 – Oct 2016 | Ottawa, ON, CA

- Designed and shipped new features to network management reporting tool to customers on very short-term cycles.
- Belonged to a tiger team that was tasked with creating the newest generation of the product.
- Built reporting tools with D3 and DataTables for ISP customers that monitored and manipulated their network data and supported business analytics.

UNIVERSITY OF WINDSOR | TEACHING ASSISTANT

April 2014 – April 2015 | Windsor, ON, CA

- Taught students the concepts of programming in C and evaluated their assignments.
- Developed communication and mentoring skills by leading discussions within the Computer Science dept.

NOKIA | APPLICATIONS ENGINEER CO-OP

Jan 2014 – April 2014 | Ottawa, ON, CA

- Worked on an IP network management product team of engineers.
- Wrote scripts in Python and Bash for JVM thread dump debugging and SQL querying.
- Created a useful data scraper for future student interns.

GREEN SHIELD CANADA | SOFTWARE DEVELOPER CO-OP

April 2013 – Aug 2013 | Windsor, ON, CA

- Shipped code to QA and Prod on a dev team dedicated to hot fixes for a health and dental benefits website.
- Helped build the current Green Shield university benefits website used by schools across Canada.
- Used C#, ASP.NET, TFS, and PL/SQL to create an automated date updater for new client benefits.
